The year 2022 which is the 8th year that the High Tech Grinding technology applied in the global market. HTG-820RC is one of the achievement of the High Tech Grinding technology. It was published in June 2022 and been loved and expected by global friends. In the XingYi Dust-free month June, 102 sets of HTG 820RC were sold across the globe within 30 days.

With a grinding width of 820mm it is suitable for industrial applications and an excellent choice for concrete floor preparation and repair as well as all polishing and grinding applications – both wet and dry.

While your machine is working its way forward, you can apply chemicals, prepare the next set of tools, adjust hoses, check the dust collector etc..

It enables significantly higher productivity and even better work results together with more ergonomic operation and effortless transportation to and from the work site.
